Company Introduction

Swiztech Solutions (Pvt) Ltd is a forward-thinking Sri Lankan technology company committed to leading digital transformation across multiple sectors—including fintech, tourism, healthcare, and enterprise IT.

Our solutions are not just about technology—they are strategic, scalable, and built to solve real-world problems. With a strong focus on innovation, local empowerment, and adaptability, we design platforms that support industry growth, generate local employment, and retain value within Sri Lanka.

From mobile-first travel platforms to national-level fintech ecosystems and smart hospital systems, our work reflects a deep understanding of both technology and market needs. Backed by strategic partnerships and domain expertise, we continue to deliver meaningful digital impact aligned with the country's development goals.

1. Project Introduction

Managing personal finances and planning for retirement can be complex, especially when existing tools fail to offer personalized projections or meaningful insights. Over the years, you have developed intelligent Excel models that accurately reflect real financial behaviors — **linking monthly budgets with long-term retirement goals.**

This proposal outlines how **Swiztech Solutions** will transform those proven spreadsheets into a **modern, data-driven mobile and web application**, providing users with real-time insights, intuitive visualizations, and actionable financial planning — all in one place.

Our mission is simple:

To empower individuals to understand how every financial decision today shapes their tomorrow.

2. Project Vision & Objectives

The goal is to create a **smart, integrated financial planning platform** that combines:

- **Monthly Budget Management**
- **Retirement Growth Projection**
- **Personalized Retirement Planner**

The system will help users:

- Track real-time income, expenses, and balances.
- See how habits today affect financial outcomes decades later.
- Build tailored retirement projections using their *own* performance data, not generic benchmarks.
- Plan withdrawals, income, and expenses post-retirement — all visualized in today's dollars.

3. System Features

◆ 1. Monthly Budget Management

- Add fixed & variable expenses (utilities, loans, rent, etc.).
- Link income streams and savings transfers.
- Auto-carry forward month-end balances.
- Visual monthly reports showing surplus/deficit.
- Smart alerts for overspending and upcoming bills.

◆ 2. Retirement Projection Engine

- Track weekly or monthly contributions.
- Automatically calculate personal average return (not market-based).
- Simulate future growth using user-specific performance data.
- Multi-scenario comparison (e.g., early retirement vs higher contributions).

◆ 3. Retirement Planner

- Convert total projected assets into **after-tax, inflation-adjusted** monthly income.
- Set multiple income sources (401K, IRA, TFSA, RRSP, etc.).
- Generate a personalized “Retirement Income Statement” up to age 90.
- Interactive sliders to visualize “what if” scenarios.

4. Unique Value Proposition

Unlike generic budgeting apps or financial planners, this solution:

- Uses **user’s real investment performance**, not market assumptions.
- Links **monthly budgets directly to retirement impact**.
- Provides **instant projections** for short-term cash flow and long-term wealth.
- Includes a **humanized retirement view** — what your life looks like at 65, 70, or 80.
- Is **independent** — no advisor fees, no commissions, no bias.

Key Features at a Glance

Feature	Description
◆ Smart Monthly Sheets	Auto-propagation of balances across months.
◆ Personal Return Projection	Future growth based on personal performance.
◆ Goal Tracker	Visualize progress toward savings or retirement goals.
◆ Alerts & Notifications	Upcoming bills, low balance, or performance drop alerts.
◆ Scenario Simulation	Compare multiple “What-if” financial paths.
◆ Report Generator	Create professional PDF summaries for advisors or clients.

4. Technical Approach

Layer	Technology	Description
Frontend (Web & Mobile)	React.js / React Native	Interactive UI with charts, dashboard, and smooth data visualization.
Backend	Node.js / FastAPI	REST API for data processing, projections, and business logic.
Database	MYSQL	Secure structured storage for financial data and projections.
Authentication	JWT	Secure login and session management.
Storage	AWS S3	File storage for reports, backups, and imports.
Analytics	Chart.js	Visualize budgets, goals, and progress in real time.

Security & Privacy Framework

- End-to-end encryption (AES-256 for data at rest, TLS for data in transit).
- Role-based access control.
- Multi-factor authentication.
- Regular security audits and encrypted backups.
- GDPR and CCPA-ready data policies.
- Option for local or cloud-based hosting depending on deployment plan.

Data Flow Summary

- **User Input:** Monthly budgets, income, and investments.
- **Data Processing:** Automatic linking of balances month-to-month.
- **Computation Engine:** Calculates real historical returns and forecasts future growth.
- **Visualization Layer:** Graphs and dashboards display progress, risk, and projections.
- **Planner Engine:** Converts totals into real retirement income (post-tax, inflation-adjusted).

Advanced Algorithms & Logic

- **Dynamic Balance Propagation:** Carries balances across months automatically.
- **Time-Weighted Return Calculation:** Uses user-specific contribution and performance data.
- **Behavior-Based Projection Model:** Forecasts future growth from historical patterns.
- **Inflation & Tax Adjuster:** Converts future income to today's value.
- **Scenario Engine:** Compares multiple retirement or spending plans instantly.

User Experience (UX) Highlights

- **Intuitive Dashboard** – “One glance view” of monthly cash flow & future retirement balance.
- **Interactive Charts** – Graphs updating live as you input data.
- **Scenario Sliders** – Adjust retirement age, contribution, or expenses in real-time.
- **Excel-Like View** – For users who love spreadsheets, familiar grid-style layout.
- **AI-based Tips (Future)** – Smart recommendations to improve financial health.
